## Columbia SPM20 508mm Concrete Block Machinery

The Model SPM20 is the workhorse of the Indian concrete block industry for over 15 years with over 200 machines in operation all over the country, producing high quality, high strength, concrete hollow and solid blocks, interlocking paver blocks, flyash bricks, retaining wall blocks, kerbstones, etc.. Designed to deliver continuous high speed performance, the Model SPM 20, is the perfect entry level machine for the concrete block industry. Using Columbia's superior engineering and famed vertical mould vibration technology, CVT, combined with low cost manufacturing in India, the Model SPM 20 machine, with its simple yet effective product handling system and strong service support, provides the best opportunity to earn higher returns at lower plant investment levels as compared to competition.

- High strength product
- 20% Lower cement consumption
- Accurate height control ( $\pm 0.5\text{mm}$ )
- Uniform density
- Fast cycle times
- 50% Longer mould life
